

(TMI Focus, Vol. XXII, No. 2, Spring 2000)

## **Quarterly Tape**

### *Visiting the Year 2050*

Cocreating our own reality begins with perceiving internally that which is to be expressed externally. Using this model, TMI has created a tape series inspired by The Pathfinding Project originated by the Institute of Noetic Sciences. *Visiting the Year 2050*—the first tape in the series—is designed to guide you in perceiving the world we will all share fifty years from now. By focusing our intention together through this, and the forthcoming exercises, we can envision and manifest a world reality that is just, sustainable, and compassionate for everyone. Thank you for your willingness to walk this path with us.
